Spare Part - Hydraulic Seal Kit

Vicor Manufacturing — Product Datasheet

Description

Complete replacement seal kit for standard hydraulic cylinders, including piston seals, rod seals, wipers, and O-rings, manufactured from high-durability polyurethane and NBR compounds.

Specifications

Material:	Polyurethane / NBR
Kit Contents:	Piston Seal, Rod Seal, Wiper, O-Rings
Temperature Range:	-30°C to 100°C
Compatible Bore:	63-100 mm

Frequently Asked Questions

Q: Which cylinder bore sizes does this kit fit?

A: Compatible with standard cylinders in the 63mm to 100mm bore range; confirm exact bore before ordering.

Q: What fluid types is this kit compatible with?

A: Compatible with mineral oil-based hydraulic fluids; consult us for water-glycol or fire-resistant fluid compatibility.

Q: Does the kit include installation instructions?

A: Yes, a fitting guide is included with every kit; a datasheet PDF is also available above.
